

THE FUTURE OF DESIGN

ZERO WUD

WOOD MADE OF ZERO WOOD

ETHICAL

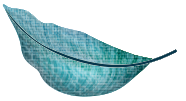

THE BUILDERS OF AN ETHICAL TOMORROW.

Ever since our inception, we have been introducing more sustainable and eco-friendly products such as doorframes, decorative panels, fluted CNC routed panels and many more. We believe in growing responsibly through Make in India initiative.

INNOVATION

THE MAN WITH THE VISION

“Innovation, improvisation and contribution are the dynamic principles of Life. I subscribe to the theory that any business must align with the health & overall progress of society. After spending over 35 years in the plywood industry and being the founder of Uniply – a brand reverberating quality and divesting at an appropriate time, I realized, there was a need for change. That is when I came up with Indowud NFC – Natural Fibre Composite Boards, the first of its kind in India as a futuristic and sustainable option.

While plywood comes at a cost of deforestation, Indowud and Zerowud is truly a green building initiative. The journey has just begun and miles to go... Do join us in our endeavor to conserve, protect and respect the environment by making better choices.

Cheers! ”

DESIGN

Cutting down a forest for the perfect wooden look is passe. The world is moving towards a more responsible future.
One where nature and design co-exist.
Where design doesn't destroy, it creates.

FUTURE OF WOOD IS ZERO WUD

DESIGN
IS EVER
EVOLVING.
In the world of design,
new ideas for today are strategic solutions
of tomorrow. Care for the environment is
one among many.

ZERO WUD

THE EVOLVED WOOD.

where design is timeless,
ideas are free of limitations and
wood aspires and inspires.

- Termite Proof
- Water Proof
- Flame Retardant
- Easily Machinable
- Durable
- Anti Rodent
- Good Screw Holding
- No Splintering, No Crack
- Smooth Surface
- Smoke Suppressant

ZEROWUD

THE HIGHEST QUALITY WOOD.

Zerowud is a result of over 3 years of Research and Development of proprietary technology.

Every board is made from eco-friendly, farmer-sourced natural fibres, the highest quality minerals and polymer compounds.

The creation of Zerowud strives to create a future for the enviroment and leave wood based panels in the past.

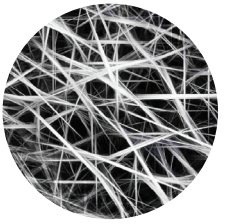

THE CREATION OF ZEROWUD

SELECTION OF RAW MATERIALS

We aquire the finest quality of resin from Taiwan, Japan and South Korea. We have also partnered with local farming community for uninterrupted supply of agri-residuals as primary raw materials.

MATRIX FORMULATION

Fibres, minerals, coupling agent, heat stabilizers, poly vinyl chloride resin and necessary additives are mixed under monitored temperature to form a homogenious matrix.

INTERFACE STRENGTH

The compound matrix is responsible for bonding of ingredients and to achieve desired density and interfacial strength of the product. This is achieved with a mathematical accuracy of every ingredient to achieve better resistance and strength of zerowud product.

MANUFACTURING

The compound is extruded under controlled temperature and pressure in a continuous process through a mould and various calibration pads. The cooling brackets settles the product in the form of a board, pulled for automatic dimentional cutting and trimming.

ZERO WUD

WHERE THE FUTURE OF WOOD IS CREATED.

Zerowud – A natural agri fibre composite product is today's solution for the future of environment. We manufacture and supply NAFC products for architects and Designers in the furnishing industry across the globe.

Zerowud is proud to be the pioneering company to manufacture boards with the highest content of fibres in its cutting edge manufacturing facility in Chennai, India.

ZERO WUD
MOVEMENT

WE
DON'T KILL
TO CREATE

WE
DON'T CUT DOWN
TO BUILD

WE WILL
NOT DESTROY
TO DESIGN
